

OpenClaw Quick Reference Card

The most important commands in one place. Come back here whenever you need something fast. You can also print this and keep it next to your screen.

GATEWAY COMMANDS

Starting & stopping

`openclaw gateway`

Start the gateway (local)

`openclaw gateway --force`

Kill stuck process and restart

`openclaw gateway stop`

Stop the gateway

`openclaw gateway install`

Install as system service (runs 24/7)

Troubleshooting

`openclaw doctor --fix`

Scan and auto-fix problems

`openclaw logs --follow`

Watch live logs

`openclaw update`

Update to latest version

`openclaw doctor`

Health check (no changes)

TELEGRAM SHORTCUTS

In-chat commands

`/new`

Start a fresh session (fixes most issues)

`/model`

Switch AI model

`/restart`

Restart the agent

`/status`

Check agent status

`/help`

Show available commands

TIP

If your agent stops responding, try `/new` first. It fixes most stuck sessions.

TIP

Type `/model` to quickly switch to a free model if your credits run out.

DASHBOARD & FILES

Key URLs

`http://127.0.0.1:18789`

Local dashboard URL

`openclaw dashboard`

Open dashboard in browser

Config & data files

`~/.openclaw/`

Main data folder (Mac/Linux)

`%USERPROFILE%\openclaw\`

Main data folder (Windows)

`openclaw.json`

Main config file (inside `.openclaw`)

Open your data folder

`open ~/.openclaw`

Mac

`explorer %USERPROFILE%\openclaw`

Windows

The golden rule: tell your agent *what* you want, not *how* to do it.

VPS, Models, Scheduling & Security

Commands for Hostinger VPS users, model management, cron jobs, and keeping things safe.

VPS (HOSTINGER)

Docker commands

```
docker restart $(docker ps -aq
--filter name=openclaw | head -1)
```

Restart the container

```
docker logs $(docker ps -aq
--filter name=openclaw | head -1)
--tail 20
```

View last 20 log lines

```
docker exec -it $(docker ps -aq
--filter name=openclaw | head -1)
openclaw doctor --fix
```

Run doctor inside container

TIP

On VPS, use Docker Manager in Hostinger dashboard for start/stop. Terminal for everything else.

MODELS & ROUTING

Model management

```
openclaw models status
```

Show all connected models

```
openclaw models auth add
```

Add a new AI provider

```
openclaw models set <model>
```

Set primary model

```
openclaw models fallbacks list
```

Show fallback chain

CRON & SCHEDULING

Automated tasks

```
openclaw cron list
```

Show all scheduled jobs

```
openclaw cron status
```

Show cron system status

SKILLS & PLUGINS

Managing skills

```
openclaw skill list
```

Show installed skills

```
openclaw clawhub search <name>
```

Search the skill library

```
openclaw clawhub install <name>
```

Install a skill from ClawHub

SECURITY

Safety checks

```
openclaw security audit
```

Run a security audit

CHANNELS

Messaging

```
openclaw channels list
```

Show connected channels

```
openclaw channels status
```

Show channel health

Before any big change: back up your .openclaw folder. On Mac: open `~/ .openclaw` and copy the folder to your desktop.

Environment Variables, Links & Quick Fixes

API key names, provider URLs, and the fixes that solve 90% of problems.

ENVIRONMENT VARIABLES

API key names

`ANTHROPIC_API_KEY`

Claude models (console.anthropic.com)

`OPENAI_API_KEY`

OpenAI API (platform.openai.com)

`OPENROUTER_API_KEY`

OpenRouter (openrouter.ai)

`GEMINI_API_KEY`

Google Gemini (aistudio.google.com)

`MOONSHOT_API_KEY`

Kimi free via NVIDIA (build.nvidia.com)

`MOONSHOTAI_API_KEY`

Kimi paid (platform.moonshot.ai)

`BRAVE_API_KEY`

Brave Search (brave.com/search/api)

TIP

ChatGPT subscription uses OAuth, not an API key. No env variable needed.

USEFUL LINKS

Bookmarks

`docs.openclaw.ai`

Official documentation

`clawhub.ai`

Skill library and marketplace

`console.anthropic.com`

Anthropic API keys and billing

`platform.openai.com`

OpenAI API keys and billing

`openrouter.ai`

OpenRouter (free and paid models)

`aistudio.google.com`

Google AI Studio (Gemini key)

`build.nvidia.com`

NVIDIA NIM (free Kimi K2.5)

`ollama.com`

Local models

QUICK FIXES

90% of problems solved

Agent not responding?

1. Check your API credit balance first
2. Type /new in Telegram
3. Restart the gateway
4. Run openclaw doctor --fix

Agent crashed after config change?

1. Run openclaw doctor --fix
2. Check openclaw.json for invalid values
3. Restart the gateway

Dashboard won't load?

1. Make sure gateway is running
2. Check you're using the right port
3. Try `http://127.0.0.1:18789`

Model not working?

1. Type /model to switch models
2. Check credits at provider dashboard
3. Switch to a free model temporarily
